

Flume Slide

RAPIDFLATE™

Patented Rapidflate inflates and deflates our slides 6x faster than traditional methods.

INTEGRATED WATER DISTRIBUTION

Provides continuous water to keep the slide fast and wet via a simple water hose connection.

DYNEEMA RING OPTION

Our lightest and strongest rings can replace stainless, reduce weight, and are kinder to paintwork.

ULTRA SLICK VINYL

Eliminates coversheet which reduces weight, pack size, and areas that could trap water and cause mould.

Designed for yachts wanting something extra. The FunAir Flume Slide delivers an adrenaline-fuelled, in-air exit from a compact 3m design, fitting over the rail without touching the water and allowing flexible setup across the yacht.

MATERIAL SPECS

Commercial grade 1000 denier PVC with FR and UV ratings, 316 stainless steel, reinforced crew-lifting handles, non-slip material on steps
