# FunAir Water Parks

A FunAir Water Park is a modular system of interconnected inflatable products engineered to function as one cohesive setup.

Each piece connects using FunAir Water Mats, enabling yachts to create layouts that suit their available water space, guest profile and operational requirements. Configurations can be adapted to match the charter programme, from compact activity zones to large-scale, multi-feature installations.

Yachts may invest in a complete water park from the outset or begin with a selection of core products and expand over time. Because every element is designed within a compatible system, additional pieces integrate seamlessly as the collection grows.

# Floating Playground

The FunAir Floating Playground is a compact, multi-feature inflatable that transforms open water into an active social hub. With integrated climbing frame, slide and optional Junior BigAir Blob, it creates an engaging experience for guests of all ages, whether deployed from the swim platform or anchored off the beach.

Designed to encourage movement and interaction, the Playground brings energy and structure to any water set-up, delivering a lively yet considered presence on the water.

# Climbing Wall

The optional Floating Playground Climbing Wall is a bold inflatable designed for guests who love a challenge. With multiple climbing faces and elevated platforms, it creates a strong vertical presence on the water and brings an immediate sense of energy to the swim platform or beach set-up.

Its upright design naturally draws attention, encouraging friendly competition and repeat attempts throughout the day. Ideal for active charter groups and families alike it adds height, movement and excitement to any water programme.

# Junior BigAir Blob

The FunAir Junior BigAir Blob delivers high-energy fun in a compact, easy-to-deploy format. Positioned on the water and paired with a simple launch platform or the FunAir Floating Playground, it creates an exciting splash experience that quickly becomes a favourite with younger guests and playful charter groups alike.

The Junior BigAir Blob is all about shared laughs, repeat jumps and adding a burst of light-hearted energy to the day's programme.

# Apex Extreme Slide

The FunAir Apex Extreme Slide is a striking, freestanding inflatable that brings height and momentum to any water set-up. With a multiple climbing faces and a sweeping slide, it creates an exciting presence while delivering a fast, exhilarating return to the sea.

Whether positioned off the stern or anchored in a calm bay, the Apex Extreme Slide adds scale, energy and a true sense of occasion to any superyacht charter.

# Splash Tower

The FunAir Splash Tower is a compact vertical inflatable that brings excitement to any water park set-up. With its elevated platform and integrated slide, it offers a simple climb-and-descend experience that appeals all charter guests.

Its upright design creates a strong visual presence without requiring a large footprint, making it easy to position off the stern or in a protected anchorage. The Splash Tower adds variety, movement and a lively focal point to the day's activities on the water.

# Splash Dome

The FunAir Splash Dome is a playful, rounded inflatable designed for energetic movement and light-hearted competition on the water. Its domed surface encourages climbing, balancing and sliding, creating an interactive space that keeps guests engaged from the moment it is deployed.

Compact and easy to position off the stern or at anchor, the Splash Dome works as a lively standalone feature within any water park set-up.

# Splash Rings

The FunAir Splash Ring is an lightweight inflatable floating ring with a comfortable netted seating area, perfect for taking a break from swimming in the ocean and relaxing in the sun.

Supplied as a set of three in Small, Medium and Large to accommodate from one to four number guests, Splash Rings are quick to deploy and can be used off the yacht or during a beach excursion.

# Water Bouncer

The FunAir Water Bouncer is a classic on-water favourite, designed to bring simple, high-energy fun to any anchorage. With its wide, inflatable surface and responsive rebound, it creates an open space for jumping, splashing and relaxed play throughout the day.

Easy to deploy off the stern or off the beach, the Water Bouncer works as a standalone attraction or as part of a broader water park set-up, adding movement and laughter to any yacht charter.

# Water Joust

The FunAir Water Joust is a head-to-head inflatable designed to bring friendly competition to the water. With a central balance beam and soft jousting poles, it creates a simple yet highly engaging challenge that quickly draws in both participants and spectators.

The Water Joust delivers light-hearted rivalry and memorable moments while maintaining a compact footprint within the overall water set-up.

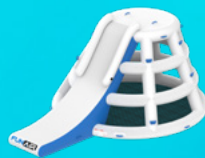

# Water Mat

The FunAir Inflatable Water Mat creates a generous, stable platform for relaxing, swimming and socialising on the water. With its broad surface and low-profile design, it extends usable space beyond the swim platform, offering guests a comfortable area to lounge or move freely between yacht and sea.

Simple to deploy and easy to integrate into any anchorage, the Inflatable Water Mat works equally well as a standalone feature or as part of a wider water park set-up.
